

GeoGames Proctor Instructions

Introduction:

GeoGames was started as a way to highlight the excellent work our installers do everyday. Too often, installers have been overlooked during the industry conferences. GeoGames gives geosynthetics installers the chance to shine. Here are a few idea of what we are looking for:

1. Be professional and make it fun! (Cheering sections located outside the testing area are welcome)
2. Encourage your welding technicians to wear company apparel such as shirts / safety vests / hard hats with your logo on them. It is okay to make this entry a shameless plug for your company. After all, that is why we are doing this — for recognition!
3. We want people to wear proper safety gear.
4. Follow all the rules set out in the Information Document. The team will be judged based upon the contents of that document.
5. Questions? Contact Phil Denis at phildenis@fcliners.com or Vincent Mondoux at vmondoux@fcliners.com.
