

GeoGames Team Application

February 12, 2019 ♦ Houston, Texas, USA ♦ Geosynthetics 2019

Introduction to GeoGames

The primary purpose of the **GeoGames** is to highlight the professionalism and the importance that the installers and the welding technicians play in the installation of geosynthetics materials. But as installers, we want to do that in a fun and informative way rather than in a lecture hall. That is why the **GeoGames** was created –to highlight YOU—the installer. *(after all, the blueprints are just pretty pictures until installers show up.)* We ask that you send your best technicians to this event. IAGI will be inviting all those who attend the Geosynthetics 2019 conference to this gathering and we want our CWTs to shine!

You are asked to wear a company team shirt that includes your company's name / logo. You will be given a safety vest and hard hat to wear during the event. IAGI wants to demonstrate that IAGI members take safety seriously—even when we get together for a good time.

Put your company's best foot forward and let your CWTs shine on the **GeoGames** battlefield!

Good Stuff to Know Before You Sign Up

At the **GeoGames**, each team will be asked to extrusion weld and wedge weld a variety of materials into an array of configurations (pipe boots, challenging angles etc.). The teams will be notified of the exact welding expectations, geomembrane types and grading process approximately 45 days in advance of the **GeoGames**. Points are given for both quality and speed of installation. Judges will be on hand to test and grade the quality of the installation. The winner of this event will take home a trophy and bragging rights.

You must be a member in good standing of IAGI as of 1 January 2019.

You must hold a CWT that is current as of 1 January 2019 and that does not expire until after 13 February 2019.

Teams will compete in the order that their application is received by IAGI. Fees must be paid to confirm the team's position on the roster.

You provide the equipment your team needs to win! Bring your welding equipment, markers, cutting equipment and a competitive spirit. We will provide the electricity and outlets needed.

If you are coming from outside North America, contact IAGI and we will try to arrange an equipment source for

you here rather than contend with different outlet configurations, getting equipment through customs and the other hassles of traveling with equipment.

No drinking of alcoholic beverages is allowed by team members until after they have completed the competition. Once the team is done competing, they will be free to imbibe at the complimentary adult-refreshment station. (provided they are 21 years of age).

There is a \$550 (USD) registration fee. You can pay via credit card, check or wire.

If you need an invoice, email Laurie Honnigford at iagi@iagi.org and ask for an invoice. Wire information will be provided on the invoice.

You can pay this fee via credit card using the IAGI website. Log into your membership account and click “pay invoice.”
